Instructions for Use

For Topical Dermatological Use Only
Rx Only

Caution:
Federal Law restricts this device to sale by or on the order of a licensed healthcare practitioner.

Description:
LOYON® is a non-sterile, topical solution, exclusively indicated for topical application. LOYON® is used to manage and relieve the scaling, burning and itching experienced with various types of dermatoses.

Ingredients:
Dicaprylyl Carbonate, Dimethicone

Indications for Use:
Under the supervision of a healthcare practitioner, LOYON® is indicated to manage and relieve the itching, erythema, and scaling experienced with various types of dermatoses, including seborrhea and seborrheic dermatitis.

Contraindications:
LOYON® must not be used on people with known hypersensitivity to any of its ingredients. If any allergic reaction should occur, treatment with LOYON® should be stopped immediately and the product should be washed off promptly.
Consult healthcare practitioner when using LOYON® with other medications.

Precautions:
LOYON® is to be used only as directed by a healthcare practitioner. Do not use to treat any condition other than that for which it is prescribed. For external use only. Avoid contact with the eyes. In rare cases, allergic reactions or local irritation can occur.

Warnings:
For topical external use only. Not for injection.
When using LOYON®, avoid contact with the eyes or mucous membranes. Should the solution get into the eyes accidentally, rinse for 10 – 15 minutes with plenty of water. If irritation persists, please consult your healthcare practitioner. If LOYON® is accidentally spilled, there is a possibility of slipping. Spillages should be cleaned up immediately. LOYON® can cause stains or may lead to superficial alterations when coming into contact with clothing or other sensitives surfaces. In case of doubt, check an inconspicuous area.

Keep this and all other medications out of the reach of children.
How supplied:
LOYON® is supplied in either 15mL or 50mL amber glass bottles with a dispensing spray pump.

Preparation:
Place the bottle on a level surface and keep paper tissues/towels at hand should spillage occur. Remove the original screw cap and replace it with the spray pump. You can leave the spray pump permanently screwed on after use. The bottle should be stored in the upright position.

Directions for Use:
Please follow these instructions in order to ensure successful use of the product. This package contains a dispensing spray pump as an application aid.

Application of LOYON® is done directly to the affected area.
1. Apply solution onto dry affected areas with the provided spray pump. Distribute the solution by lightly massaging it into the affected area. The affected areas should be well moistened with the product. Excessive solution can be gently removed using paper tissues/towels.
2. Allow the solution to stay on the skin for at least 3 hours. Longer exposure times, e.g. overnight, are possible as directed by a healthcare practitioner.
3. After the adequate exposure time, LOYON® can be washed off with a mild shampoo or a cleanser.
4. Skin management with LOYON®:
   Depending on preference and severity of the disease LOYON® can be applied as needed. Use LOYON® as directed by your healthcare practitioner. If symptoms worsen please consult your healthcare practitioner.

Storage/Handling:
Store with cap closed tightly after each use in its original container. Store at or below 25°C (77°F). Do not use after the labeled expiration date. Do not use longer than 24 months after placing pump in bottle. Keep away from direct sunlight and heat sources. Do not freeze. No special handling or disposal precautions required.
